SERIES 1

Firefighting Robot

Fire Extinguishing Robot

RXR-M40D-880T

Product parameters

Overall Size	1350*930*1040mm	Working time	2.5H
Self weight	330kg	Operation speed	1.2m/s
Suspension system	Christie + Matilda suspension	Remote control distance	1200m
Maximum obstacle crossing	140mm	Rated torque	2.4kN
Maximum climbing ability	78.1% / 35°	Protection grade	IP67

Product features

- Fire water monitor:** flow 40L/s flow, water/foam dual-use, range 65m;
- Image acquisition:** collect 4 channels of images around the robot and send them to the control center remotely;
- Information collection:** concentration of flammable gas, temperature and humidity of fire site;
- Audible and visual alarm:** audible and visual alarm is given when the robot body is running;
- Self protection function:** water curtain cooling, anti overturning, anti collision;
- Lighting:** dual LED strong light lighting system.

Product introduction

The fire fighting robot can replace the fire rescue personnel to enter the **scene of toxic, oxygen deficient, thick smoke** and other dangerous disasters to extinguish the fire, effectively solving the personal safety of fire fighters in the above places.

Application:

It is applicable to petrochemical industry, oil tank farm, large warehouse, buildings and other places with high temperature, strong thermal radiation, easy collapse, fire fighting vehicles and personnel can not be close to for fire fighting, cooling, cleaning and decontamination of chemical pollution sites, production and storage of dangerous chemicals enterprises, etc.

Fire Extinguishing Robot

RXR-M40D-11KT

Product introduction

The fire fighting robot can replace the fire rescue personnel to enter the **scene of toxic, oxygen deficient, thick smoke** and other dangerous disasters to extinguish the fire, effectively solving the personal safety of fire fighters in the above places.

Application:

It is applicable to petrochemical industry, oil tank farm, large warehouse, buildings and other places with high temperature, strong thermal radiation, easy collapse, fire fighting vehicles and personnel can not be close to for fire fighting, cooling, cleaning and decontamination of chemical pollution sites, production and storage of dangerous chemicals enterprises, etc.

Product parameters

Overall size	1286*837*965mm	Working time	2 H
Self weight	370kg	Operation speed	2m/s
Suspension system	Christie suspension	Remote control distance	1200m
Maximum obstacle crossing	150mm	Rated torque	2.4kN
Maximum climbing ability	70% / 30°	Protection grade	IP67

Product features

- Fire water monitor:** Flow 40L/s , water/foam dual-use, range 65m;
- Image acquisition:** collect 4 channels of images around the robot and send them to the control center remotely;
- Information collection:** six kinds of gas concentration detection, fire site temperature and humidity;
- Audible and visual alarm:** audible and visual alarm is given when the robot body is running;
- Self protection function:** water curtain cooling, anti overturning, anti collision;
- Lighting:** dual LED strong light lighting system.

Fire Extinguishing Robot

RXR-M80D-13KT

Product introduction

The fire fighting robot can replace the fire rescue personnel to enter the **scene of toxic, oxygen deficient, thick smoke** and other dangerous disasters to extinguish the fire, effectively solving the personal safety of fire fighters in the above places.

Application:

It is applicable to petrochemical industry, oil tank farm, large warehouse, buildings and other places with high temperature, strong thermal radiation, easy collapse, fire fighting vehicles and personnel can not be close to for fire fighting, cooling, cleaning and decontamination of chemical pollution sites, production and storage of dangerous chemicals enterprises, etc.

Product parameters

Overall size	1440*945*1410mm	Working time	3H
Self weight	660KG	Operation speed	0-1.5M/s
Suspension system	Christie suspension structure	Remote control distance	1200m-1400m
Maximum obstacle crossing	220mm	Rated torque	4.6kN
Maximum climbing ability	72.7% / 30°	Protection grade	IP67

Product features

- Fire water monitor:** Flow 80L/s , water/foam dual-use, range 85m;
- Image acquisition:** collect 4 channels of images around the robot and send them to the control center remotely;
- Information collection:** concentration of flammable gas, temperature and humidity of fire site;
- Audible and visual alarm:** audible and visual alarm is given when the robot body is running;
- Self protection function:** water curtain cooling, anti overturning, anti collision;
- Lighting:** double LED strong light.

Fire Extinguishing Robot

RXR-M80D-15KT

Product introduction

The fire fighting robot can replace the fire rescue personnel to enter the **scene of toxic, oxygen deficient, thick smoke** and other dangerous disasters to extinguish the fire, effectively solving the personal safety of fire fighters in the above places.

Application:

It is applicable to petrochemical industry, oil tank farm, large warehouse, buildings and other places with high temperature, strong thermal radiation, easy collapse, fire fighting vehicles and personnel can not be close to for fire fighting, cooling, cleaning and decontamination of chemical pollution sites, production and storage of dangerous chemicals enterprises, etc.

Product parameters

Overall Size	1540*845*1270mm	Working time	5H
Self weight	380kg	Operation speed	1.3m/s
Suspension system	Christie + Matilda suspension	Remote control distance	200m
Maximum obstacle crossing	230mm	Battery	48v100AH
Maximum climbing ability	70%/30°	Protection grade	IP65

Product features

- Fire water monitor:** Flow 80L/s , water/foam dual-use, range 85m;
- Image acquisition:** collect 4 channels of images around the robot and send them to the control center remotely;
- Information collection:** concentration of flammable gas, temperature and humidity of fire site;
- Audible and visual alarm:** audible and visual alarm is given when the robot body is running;
- Self protection function:** water curtain cooling, anti overturning, anti collision;
- Lighting:** double LED strong light.

15M Lifting Fire Fighting Robot RXR-M40L

Product parameters

Overall size	7000*2000*2600mm	Working time	6hr (Extinguishing time)
Self weight	6500KG	Operation speed	0-1.4M/s
Power mode	DC drive system+hydraulic drive	Remote control distance	Wireless 600m Wired 15m or more
Lifting arm extension time	155s	Lifting time	150s
Lifting arm Max turning Angle	355°	Protection grade	IP54

Product features

- Fire water monitor:** Flow 40L/s, with a range of 65m;
- Image acquisition:** the images around the robot are collected and transmitted to the control center at any time;
- Information collection:** concentration of flammable gas, temperature and humidity of fire site;
- Audible and visual alarm:** audible and visual alarm is given when the robot body is running;
- Self protection function:** front and rear anti-collision function of vehicle body;
- Lighting:** dual LED strong light lighting system.

Product introduction

The lifting firefighting robot can replace fire rescue personnel to enter the scene of flammable/explosive/toxic/anoxic/thick smoke and other dangerous disasters to extinguish the fire, effectively solving the personal safety faced by the fire fighters in the above places.

Application:

It is applicable to petrochemical industry, oil tank farm, large warehouse, buildings and other places with high temperature, strong thermal radiation, easy collapse, fire fighting vehicles and personnel can not be close to for fire fighting, cooling, cleaning and decontamination of chemical pollution sites, production and storage of dangerous chemicals enterprises, etc.

15M Lifting Fire Fighting Robot

RXR-M60L

Product parameters

Overall size	7500*2000*2400mm	Working time	6hr (Extinguishing time)
Self weight	7400KG	Operation speed	0-1.2M/s
Power mode	DC drive system+hydraulic drive	Remote control distance	Wireless 600m Wired 15m or more
Lifting arm extension time	155s	Lifting time	150s
Lifting arm Max turning Angle	355°	Protection grade	IP67

Product features

- Fire water monitor:** Flow 60L/s, with a range of 70m;
- Image acquisition:** the images around the robot are collected and transmitted to the control center at any time;
- Information collection:** concentration of flammable gas, temperature and humidity of fire site;
- Audible and visual alarm:** audible and visual alarm is given when the robot body is running;
- Self protection function:** front and rear anti-collision function of vehicle body;
- Lighting:** dual LED strong light lighting system.

Product introduction

The lifting firefighting robot can replace fire rescue personnel to enter the scene of flammable/explosive/toxic/anoxic/thick smoke and other dangerous disasters to extinguish the fire, effectively solving the personal safety faced by the fire fighters in the above places.

Application:

It is applicable to petrochemical industry, oil tank farm, large warehouse, buildings and other places with high temperature, strong thermal radiation, easy collapse, fire fighting vehicles and personnel can not be close to for fire fighting, cooling, cleaning and decontamination of chemical pollution sites, production and storage of dangerous chemicals enterprises, etc.

Product introduction

The fire monitor or water mist fan can be remotely controlled to the required position; Effectively replace fire fighters to carry out reconnaissance, fire fighting, smoke exhaust and other operations near fire sources and dangerous places.

Application:

Applicable occasions include but are not limited to highway (railway) tunnels, subway stations and tunnels, underground facilities and freight yards, large span and large space plants, petrochemical oil depots and refineries; It can also be used for the detection, attack and cover of targets, fire fighting and rescue of dangerous occasions in large-scale toxic gas and smoke accidents and dangerous fires.

Product parameters

Overall size	2400*1500*1850mm	Working time	10H
Self weight	2100KG	Operation speed	9KM/h
Climbing ability	70% /40°	Remote control distance	1000m
Maximum obstacle crossing	300mm	Traction force	14KN

Product features

- Fire water monitor:** imported duckbill water/foam dual-use, 120L/s flow, range 95m;
- Image acquisition:** collect 3 channels of images around the robot and send them to the control center remotely at any time. The video has 4G wireless HD transmission function;
- Fault alarm:** high engine oil and hydraulic oil temperature, low engine oil pressure, low oil level, blocked oil suction or oil filter, engine air filter alarm, bus communication fault, low battery voltage;
- Self protection function:** automatic water mist protection system;
- Lighting:** front and rear dual LED strong light;
- Control mode:** on-board panel and wireless remote control, remote control distance 1KM;
- Fuel tank capacity:** 80L for fuel tank and 100L for hydraulic tank.

Diesel Power 4-Drives Fire Robot RXR-M150GD

Product introduction

The fire monitor or water mist fan can be remotely controlled to the required position; Effectively replace fire fighters to carry out reconnaissance, fire fighting, smoke exhaust and other operations near fire sources and dangerous places.

Application:

include but are not limited to highway (railway) tunnels, subway stations and tunnels, underground facilities and freight yards, large span and large space plants, petrochemical oil depots and refineries; It can also be used for the detection, attack and cover of targets, fire fighting and rescue of dangerous occasions in large-scale toxic gas and smoke accidents and dangerous fires.

Product parameters

Overall size	2280*1600*1350mm	Working time	10H
Self weight	2240 KG	Operation speed	12.28 KM/h
Climb ability	40°	Remote control distance	1000m
Max obstacle crossing	300mm	Tractive force	15kN

Product features

- Fire water monitor:** import water/foam dual-use water monitor, 150L/s flow, range 95m;
- Image acquisition:** collect 3 channels of images around the robot and transmit them to the control center in real-time. The video system has 4G wireless HD transmission function;
- Fault alarm:** high engine oil and hydraulic oil temperature, low engine oil pressure, low oil level, blocked oil suction or oil filter, engine air filter alarm, bus communication fault, low battery voltage;
- Self protection function:** automatic water mist protection system;
- Lighting:** front and rear dual LED strong light;
- Control mode:** on-board panel and wireless remote control, remote control distance 1KM;
- Fuel tank capacity:** 80L for fuel tank and 100L for hydraulic tank;
- Optional functions:** obstacle removal function and video recording function.

Product parameters

Overall size	1750*920*1600mm	Working time	2.5H
Self weight	750KG	Operation speed	0-1.5M/s
Suspension system	Christie suspension structure	Remote control distance	1000m
Maximum obstacle crossing	220mm	Rated torque	4.2kN
Maximum climbing ability	72%	Protection grade	IP67

Product features

- Fire water monitor:** Import water monitor flow 80L/s, water/foam dual-use, range 85m;
- Smoke exhaust fan:** Rated air volume $\geq 10000\text{m}^3/\text{h}$;
- Image acquisition:** Collect 4 channels of images around the robot and send them to the control center remotely;
- Information collection:** Concentration of flammable gas, temperature & humidity of fire site;
- Audible & visual alarm:** Audible and visual alarm is given when the robot body is running;
- Self protection function:** Water curtain cooling, anti overturning, anti collision;
- Lighting:** Dual LED strong light lighting system.

Product introduction

The fire fighting robot can replace the fire rescue personnel to enter the **scene of toxic, oxygen deficient, thick smoke** and other dangerous disasters to extinguish the fire, effectively solving the personal safety of fire fighters in the above places.

Application:

It is applicable to petrochemical industry, oil tank farm, large warehouse, buildings and other places with high temperature, strong thermal radiation, easy collapse, fire fighting vehicles and personnel can not be close to for fire fighting, cooling, cleaning and decontamination of chemical pollution sites, production and storage of dangerous chemicals enterprises, etc.

Smoke-exhaust 8M Lifting Fire Robot RXR-YM100000D

Product introduction

Fire fighting smoke exhaust robot is an intelligent multi-functional fire fighting robot, which has the functions of smoke exhaust, firefighting, air supply, cooling, dust removal, obstacle removal, environmental detection, image acquisition, wireless information transmission, and climbing obstacles and walking on its own. It can replace firefighters to deal with various accidents safely and efficiently.

Application:

include but are not limited to highway (railway) tunnel fire, subway station and tunnel fire, underground facilities and freight yard fire, large-span and large-span workshop fire, petrochemical oil depot and refinery fire; It can also be used for the detection, attack and cover of targets, fire fighting and rescue of dangerous places in large-scale toxic gas and smoke accidents and dangerous fires.

Product parameters

Overall size	≤3160*1830*2500mm	Working time	10H
Weight	4000Kg	Operation speed	5KM/h
Climb ability	30°	Remote control distance	1000m
Max obstacle crossing	320mm	Tractive force	27kN

Product features

- Fire water monitor:** water and foam dual-use monitor, 80L/s flow, 85m range;
- Fan:** exhaust air volume 100000m³/ h. Water mist flow ≥ 450L/min, water mist range ≥ 45m, fan speed 2000 rpm;
- Image acquisition:** collect 3 channels of images around the robot and send them to the control center remotely;
- Self protection function:** multiple groups of self spraying cooling devices;
- Lighting:** front four and rear two LED strong lights;
- Control mode:** on-board panel and wireless remote control, remote control distance 1KM;
- Cooling system:** air cooling & water cooling are adopted for the diesel engine and hydraulic oil system

Product introduction

The fire monitor or water mist fan can be remotely controlled to the required position; Effectively replace fire fighters to carry out reconnaissance, fire fighting, smoke exhaust and other operations near fire sources and dangerous places.

Application:

include but are not limited to highway (railway) tunnels, subway stations and tunnels, underground facilities and freight yards, large span and large space plants, petrochemical oil depots and refineries; It can also be used for the detection, attack and cover of targets, fire fighting and rescue of dangerous occasions in large-scale toxic gas and smoke accidents and dangerous fires.

Product parameters

Overall size	2800*1600*2500mm	Working time	10H
Weight	3600KG	Operation speed	5KM/h
Climb ability	30°	remote control distance	1000m
Max obstacle crossing	220mm	Tractive force	27kN

Product features

- Fire water monitor:** Import water&foam dual-use monitor, 80L/s flow, 85m range;
- Fan:** exhaust air volume $150000\text{m}^3/\text{h}$. Water mist flow $\geq 1000\text{L}/\text{m}$, water mist range $\geq 50\text{m}$, fan speed 2000;
- Image acquisition:** collect 3 channels of images around the robot and transmit them to the control center in real-time. The video system has 4G wireless HD transmission function;
- Fault alarm:** high engine oil and hydraulic oil temperature, low engine oil pressure, low oil level, blocked oil suction or oil filter, engine air filter alarm, bus communication fault, low battery voltage;
- Self protection function:** automatic water mist protection system;
- Lighting:** front four and rear two LED strong lights;
- Fuel tank capacity:** 100L for fuel tank and 120L for hydraulic tank;
- Control mode:** on-board panel and wireless remote control, remote control distance 1KM;
- Optional functions:** obstacle removal function and video recording function.

Explosion-proof Fire Fighting Robot RXR-MC80BD

Product introduction

The fire fighting robot can replace the fire rescue personnel to enter the **scene of toxic, oxygen deficient, thick smoke** and other dangerous disasters to extinguish the fire, effectively solving the personal safety of fire fighters in the above places.

Application:

Fire rescue forces; PetroChina and Sinopec exploration sites and warehouses; Dangerous chemicals production enterprises; Warehouses, logistics, ports, etc. with inflammable and explosive products.

Product parameters

Overall size	1900*900*1426mm	Working time	5H
Weigh	720KG	Operation speed	0-1.3M/s
Suspension	Christie suspension structrue	RC distance	1200m
Max obstacle	220mm	Rated torque	4.6kN
Max climbing	70% / 38°	Protection grade	IP67

Product features

- Imported fire water monitor:** 80L/s flow, water/foam dual-use, range 85m;
- Image acquisition:** collect 4 channels of images around the robot and send them to the control center remotely;
- Bidirectional voice:** collect the sound around the robot body and call through the controller;
- Lighting:** double LED strong light;
- Audible and visual alarm:** audible and visual alarm is given when the robot body is running;
- Automatic obstacle avoidance:** detect obstacles in front when traveling to avoid collision;
- Spray cooling:** double water curtain spray cooling;
- Infrared thermal imager:** detect life body, fire source temperature and fire source center point;
- Explosion proof sign:** Ex d ib mb IIB+H2 T6 Gb.

SERIES 3 Industry & Science Tank Platform Robot

Robot Chassis Safari 138T

▶ Product features

- Turn in place
- Stable
- Small investigation
- Support non-standard product development and customization

▶ Product parameters

Dimensions	610*450*195mm	Max climbing	30 degree no load
Self weight	24kg	Motor	24V DC brushless motor
Load weight	20kg	Body material	Steel plate
Rated power	138W*2	Suspension system	Christie
Operating speed	0~1.2m/s	Height of chassis	90mm
Max obstacle	50mm	Track material	rubber+fiber
Vibration reduction	*12 independent damping vibration absorbers on both sides

Swinging Arm Robot Chassis PS800 & PS1000 & PS1500

Product features

- The robot chassis also has the advantages of high waterproof protection level, strong load capacity, strong all-terrain mobility, etc., which is widely used in robot mobility solutions in complex environments.
- The chassis of the double-swinging arms explosive-removal robot should have the characteristics of high obstacle crossing and strong trench crossing for unstructured road conditions. It is widely used in military explosive-removal rescue and other fields.
